

National Comprehensive
Cancer Network®

Quality,
Effective,
Equitable,
Accessible

NCCN 2023
Annual Report

NCCN is an alliance of leading cancer centers devoted to patient care, research, and education.

Our mission is to improve and facilitate quality, effective, equitable, and accessible cancer care so all patients can live better lives.

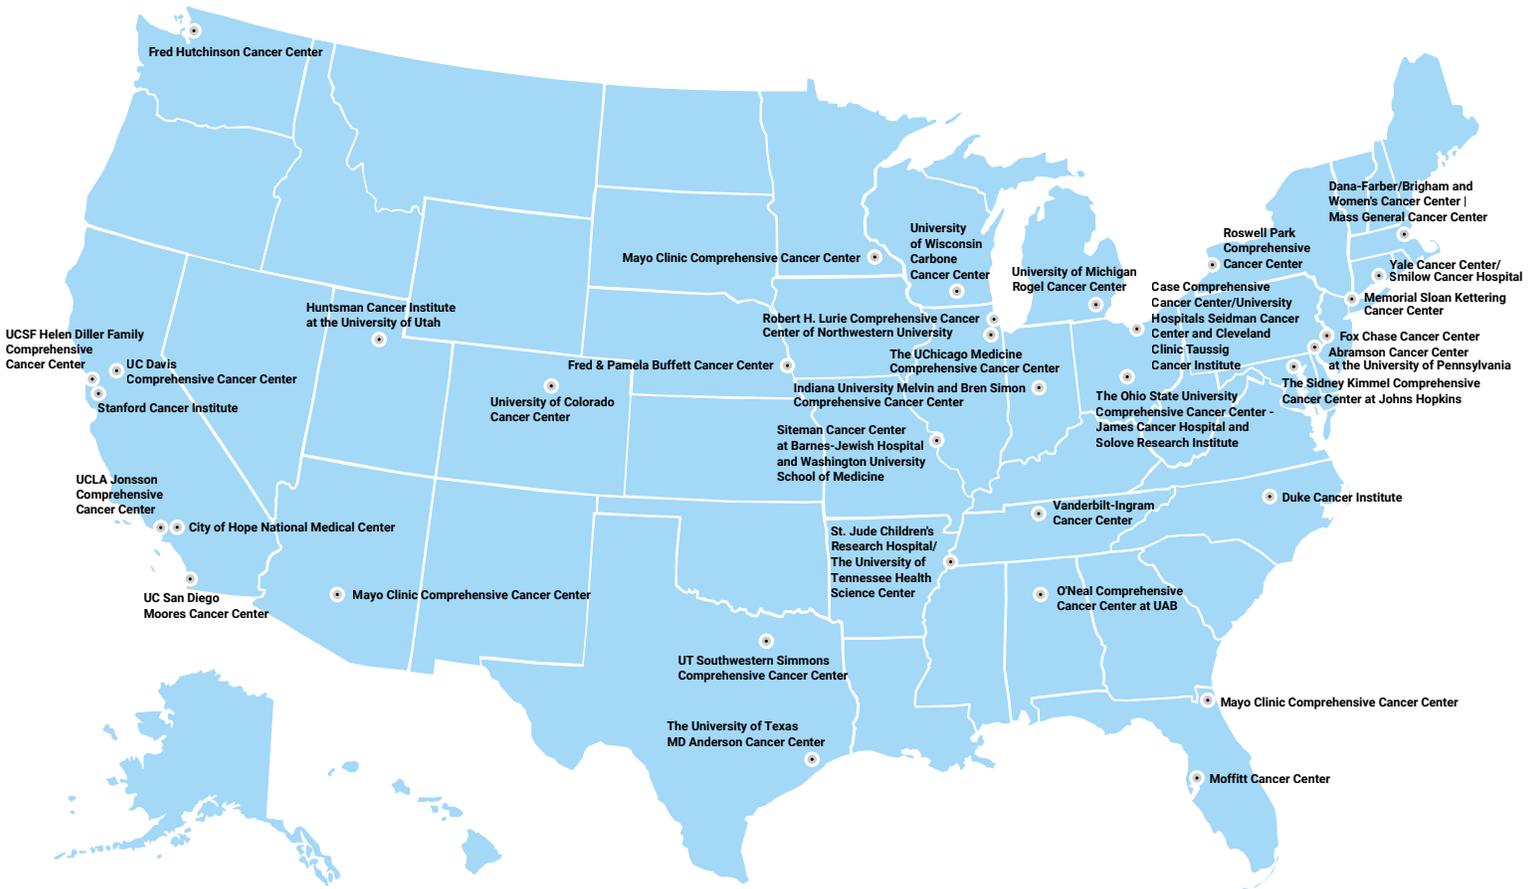

Our vision is to define and advance high-quality, high-value, patient-centered cancer care globally.

Message from the Chair of the Board and CEO

Message from the Chair of the Board and Chief Executive Officer

The National Comprehensive Cancer Network® (NCCN®) had a year of successful transition and growth, entering a new phase with the retirement of longtime CEO Robert W. Carlson, MD, and the recruitment and appointment of our new CEO, Crystal S. Denlinger, MD. As NCCN continues to evolve, our commitment to our mission remains our core focus. Through the engagement and expertise of our alliance of leading cancer centers and the resources and programs we create together, we continue to improve and facilitate quality, effective, equitable, and accessible cancer care globally so that all patients can live better lives.

This report highlights the work NCCN has done across the oncology landscape during the past year, building on our past success and exploring new ways to advance our mission.

In 2023, the NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®) were downloaded more than 15.1 million times. Additionally, NCCN Guidelines were updated 210 times to reflect new scientific evidence and clinical information that modified current clinical practice standards to achieve optimal patient outcomes. These milestone achievements were possible due to more than 1,900 multidisciplinary experts across our NCCN Member Institutions who served on NCCN Guidelines® Panels. Additionally, our Compendia and Chemotherapy Order Template libraries expanded, including publication of the first pediatric chemotherapy order templates in conjunction with our expanding set of NCCN Guidelines for pediatric cancers. These derivative resources also benefitted from the review of our Member Institution experts engaged in our work.

Our alliance grew in 2023 as we welcomed The UChicago Medicine Comprehensive Cancer Center as our 33rd Member Institution, further growing and expanding our dedication to patient care, research, and education in oncology. We awarded funding to four NCCN Foundation® Young Investigators and other Oncology Research Program investigators for work in clinical and basic science, quality improvement, and health outcomes. Our Annual Conference successfully launched in hybrid fashion, and we continued providing increased access to attendees through virtual or in-person engagement.

NCCN continues to engage the oncology community to advance equity, inclusion, and the elimination of disparities. Last year, NCCN prioritized the use of sensitive, respectful, and inclusive language in our publications and resources through the use of person-first terminology, language without blame, stigma or gender, and representative imagery. NCCN also announced a DEI Directors Forum to share information and advance best practices related to diversity, equity, and inclusion and offered continuing education sessions highlighting strategies to reduce health disparities in addition to education regarding appropriate cancer care. Recognizing that unmet health-related social needs contribute

Message from the Chair of the Board and CEO

to disparities in care and outcomes, NCCN convened a working group to develop recommendations for addressing these needs; recommendations were presented during our September Policy Summit. NCCN continued work on state and national levels to address emerging issues, including supporting bipartisan legislation to expand biomarker testing and calling for action to address cancer drug shortages. NCCN worked with the White House, National Cancer Institute, Centers for Medicare & Medicaid Services, Congress, and other nonprofits to collectively find solutions.

We grew global collaborations by continuing to adapt and disseminate the critical knowledge contained in the NCCN Guidelines through our regional harmonizations and adaptations, as well as through our translated resources. Our commitment to advancing global cancer care was recognized with an award from Spain's ECO Foundation at this year's ESMO Congress. With support from the NCCN Foundation, NCCN's library of patient resources now includes 71 NCCN Guidelines for Patients® on a regular update schedule and several updated global resources to address the ever-growing need for accessible cancer care information worldwide. In 2023, six new NCCN Guidelines for Patients were created, and we hosted our first patient webinar focused on pediatric cancer. Our award-winning patient resources continue to be recognized for excellence in conveying crucial consumer health information.

Our achievements were made possible because of the dedication of NCCN Member Institutions and experts; our staff at Headquarters; members of boards, committees, working groups, forums, and panels; various supporters; and all those who access and incorporate our resources into their practice. We are grateful for the opportunity to work together to continue to lead the oncology community through recommendations on appropriate cancer care, education, research, collaboration, and advocacy for quality, effective, equitable, and accessible cancer care globally.

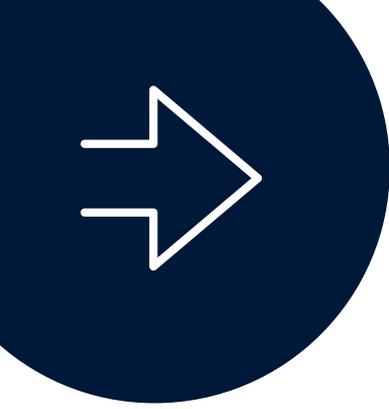

Sincerely,

John W. Sweetenham, MD, FRCP, FACP, FASCO

In 2023, NCCN continued to lead the way by providing all oncology stakeholders with reliable and up-to-date information through publication of and continuous updates to the library of NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®) and associated clinical content.

The NCCN Guidelines® are a comprehensive set of guidelines detailing the sequential management decisions and interventions that currently apply to more than 97 percent of cancers affecting patients in the United States.

NCCN Member Institution experts seated on NCCN Guidelines Panels develop the NCCN Guidelines and continuously update and revise them to reflect the latest advances in preventive, diagnostic, treatment, and supportive services. NCCN Guidelines Panel Members include multidisciplinary, disease-specific sub-specialists who are both clinicians and researchers, as well as patient advocates. Each guideline undergoes annual institutional review where it is circulated for comment among the faculty at each NCCN Member Institution.

External parties, including patients, patient advocates, clinicians outside the Member Institutions, industry, and/or payers are invited to submit requests for specific issues or topics to be discussed by the NCCN Guidelines Panels. In 2023, NCCN implemented a new process for submission requests to include an easy-to-complete form and the ability to view status updates of submissions.

NCCN Guidelines

About the Guidelines

NCCN Guidelines contain cancer care recommendations that are continuously updated and revised to reflect new data and clinical information.

- NCCN Categories of Evidence and Consensus are based on the level of clinical evidence available and the degree of consensus within NCCN Guidelines Panels.
- NCCN Categories of Preference clarify panel and institutional preferences for interventions, provide guidance to users of the NCCN Guidelines on which recommendation(s) is considered optimal, and continue to provide a wide range of recommendations to meet varying clinical circumstances and patient preferences.
- NCCN Guidelines with NCCN Evidence Blocks™ are a visual representation of five key measures that provide important transparent information about specific NCCN Guidelines recommendations to inform decisions about systemic therapies based upon treatment, supporting data, and cost. It is a starting point for shared decision-making considering the patient's own value system.

Types of Guidelines

- NCCN Guidelines for Treatment by Cancer Type
- NCCN Guidelines for Detection, Prevention, & Risk Reduction
- NCCN Guidelines for Supportive Care
- NCCN Guidelines for Specific Populations
- NCCN Guidelines with NCCN Evidence Blocks™

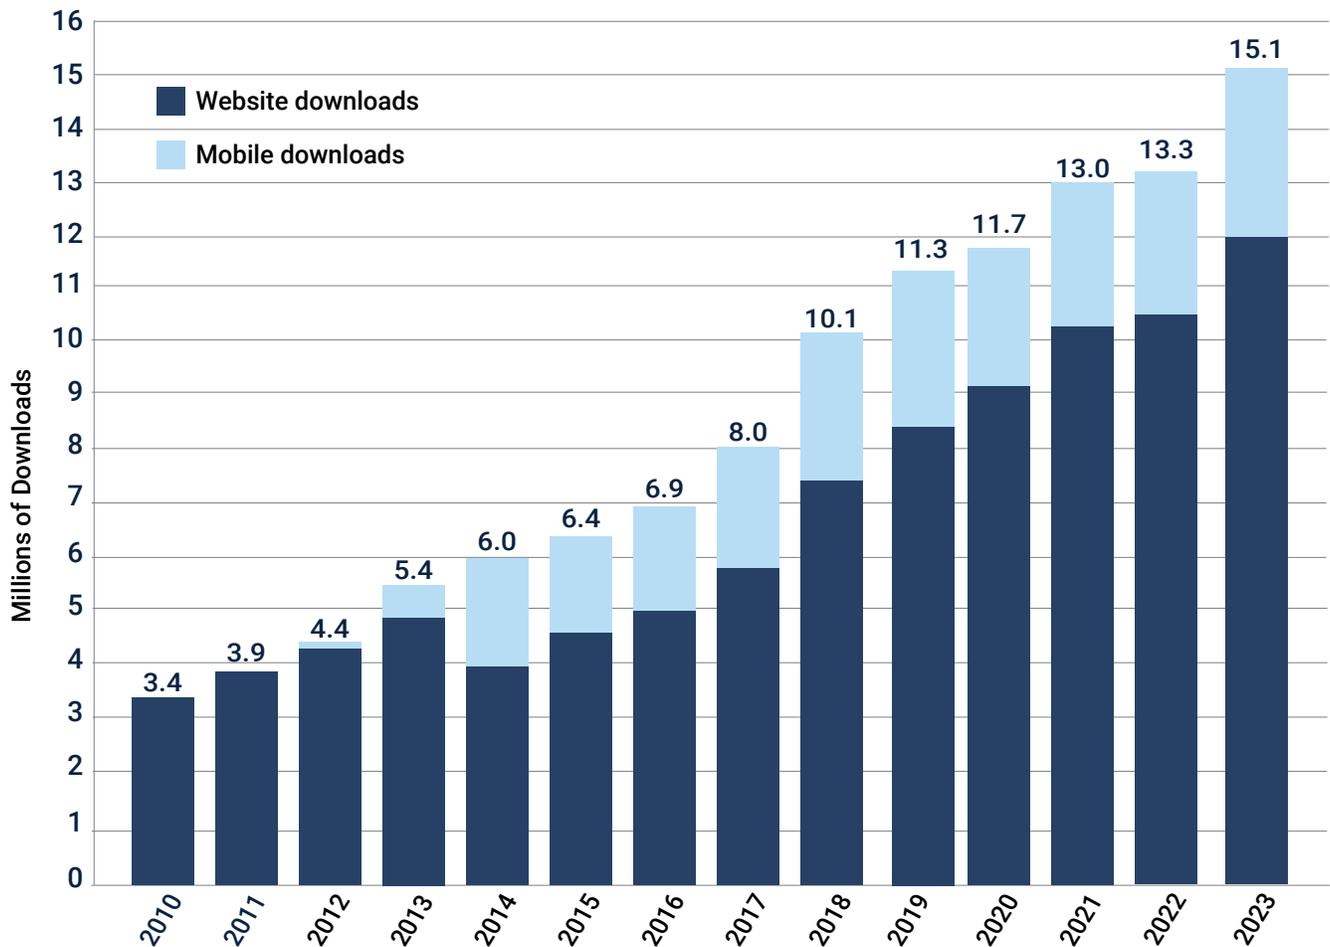

Access to the Guidelines

- Free download online for non-commercial use from [NCCN.org](https://www.nccn.org)
- NCCN app
- Print copies
- Pocket Guidelines
- Email alerts (with subscription to NCCN Flash Updates™)
- Health Information Technology (HIT) companies

NCCN Guidelines® are the most thorough and frequently updated clinical practice guidelines available in any area of medicine.

There were more than 15.1 million downloads of NCCN Guidelines in 2023.

NCCN Guidelines Downloads By Year (millions)

Numbers rounded to the nearest decimal. Totals include downloads from international sites and apps.

Resources Based on NCCN Guidelines

NCCN Drugs & Biologics Compendium (NCCN Compendium®)

Authoritative, scientifically derived information designed to support decision-making about the appropriate use of drugs and biologics in patients with cancer

- Contains more than 7,500 records across 71 NCCN Guidelines
- Updated in conjunction with the NCCN Guidelines on a continual basis
- Recognized by public and private insurers as an authoritative reference for oncology coverage policy

Subscription-based searchable database

NCCN Biomarkers Compendium®

Information to support decision-making around the use of biomarkers in cancer care

- Provides essential details for tests recommended by the NCCN Guidelines, such as tests that measure changes in genes or gene products for predictive, diagnosis, monitoring, surveillance, or prognostic information
- Contains more than 1,400 records

Subscription-based searchable database

NCCN Imaging Appropriate Use Criteria (NCCN Imaging AUC™)

Details of imaging recommendations included in the NCCN Guidelines

- Available across 71 NCCN Guidelines, including screening and supportive care, and covering approximately 1,288 imaging recommendations
- Recognized by public and private insurers as an authoritative imaging reference for oncology coverage policy

Free searchable database

NCCN Radiation Therapy Compendium™

Information to support clinical decision-making around the use of radiation therapy in patients with cancer

- Includes a full complement of more than 1,035 radiation therapy recommendations found in the NCCN Guidelines
- Available for 55 NCCN Guidelines containing radiation therapy recommendations
- Recognized by public and private insurers as an authoritative radiation therapy reference for oncology coverage policy

Subscription-based searchable database

NCCN Chemotherapy Order Templates (NCCN Templates®)

Improving the safe use of drugs and biologics in cancer care for 15 years!

- Includes chemotherapy, immunotherapy, and supportive care agents, monitoring parameters, and safety instructions
- Special instructions for self-administered chemotherapeutic agents also provided
- Contains more than 2,600 active templates covering more than 100 cancer types
- Accessed more than 2.1 million times in 2023

Subscription-based searchable database

Available online at [NCCN.org](https://www.nccn.org).

The most frequently downloaded NCCN Guidelines in 2023

NCCN Guidelines for Breast Cancer	1,137,517 Downloads
NCCN Guidelines for Non-Small Cell Lung Cancer	808,760 Downloads
NCCN Guidelines for Prostate Cancer	651,712 Downloads
NCCN Guidelines for Colon Cancer	569,132 Downloads

The NCCN Guidelines Panel for Prevention and Treatment of Cancer-Related Infections (pictured left) and the Smoking Cessation Panel (pictured right) each had meetings at NCCN Headquarters in December 2023.

Sensitive, Respectful, and Inclusive Language for NCCN Publications

View NCCN's Guidance on Inclusive Language at [NCCN.org/about](https://www.nccn.org/about).

NCCN strives to avoid stigmatizing, alienating, or excluding anyone based on sexual orientation or gender identity, race and/or ethnicity, age, health condition, or any other specific identity or experience. In efforts to achieve this, NCCN is using person-first terminology, language without blame or stigma, and wording that is inclusive of people of all sexual orientations and gender identities. Additional changes are currently being implemented to standardize language in other areas across NCCN publications.

Celebrating 15 Years of NCCN Chemotherapy Order Templates

Learn more at [NCCN.org/templates](https://www.nccn.org/templates).

In 2023, NCCN celebrated the 15th anniversary of the NCCN Chemotherapy Order Templates program. There are currently 2,632 published NCCN Templates[®] covering 108 cancer types, representing 97 percent of all systemic therapy recommendations across 58 NCCN Guidelines for adult cancer types. In addition, the first template library for a pediatric cancer type was published in 2023, for pediatric aggressive mature B-cell lymphomas.

NCCN Global Impact

49%

Total number of registered
users of NCCN Guidelines
who live outside of the
United States

271

Total number of translations
of NCCN Guidelines and
associated clinical resources

In 2023, NCCN published more than 76 new and updated translations of NCCN Guidelines and associated clinical resources. There are now 271 total translations available, and 51 NCCN Guidelines have been translated into one or more languages.

Improving Thyroid Cancer Care Around the World

NCCN published new NCCN Framework for Resource Stratification of NCCN Guidelines (NCCN Framework™) for Thyroid Carcinoma to provide guidance on the optimal treatment approach for differentiated thyroid cancer in resource-constrained settings. In 2023, NCCN debuted this new global resource to improve thyroid cancer care in low- and middle-income countries at the World Congress on Thyroid Cancer in London, UK.

Global Health Council Roundtable Advancing International Coordination in Cancer Care

NCCN announced the appointment of Katy Winckworth-Prejsnar, MPH, NCCN's Senior Manager of Global Policy and Strategic Alliances, as Co-Chair of the Global Health Council (GHC)'s Non-Communicable Diseases (NCD) Roundtable. In this role, Winckworth-Prejsnar helps drive coordination between organizations worldwide that are working to improve policy and outcomes for cancer and other global health concerns.

China

NCCN collaborated with the Chinese Gynecological Cancer Society (CGCS) and Shanghai Cultural Firm to adapt guidelines to be regionally appropriate for effective management of gynecologic cancers, including cervical cancer, ovarian/fallopian tube/primary peritoneal cancers and uterine neoplasms. These clinical resources were also translated into Chinese by leading experts in the region.

Vietnam

In May 2023, NCCN signed a Memorandum of Understanding (MOU) with Vietnam National Cancer Hospital (“K Hospital”) and the Vietnam Cancer Association to work together to improve the standards for cancer care throughout Vietnam. Shown below, NCCN worked with local experts in Vietnam to create a pilot version of NCCN Harmonized Guidelines™ for Vietnam: Non-Small Cell Lung Cancer. These harmonized resources were published in November 2023.

Middle East and North Africa (MENA)

NCCN expanded the library of adapted guidelines tailored for the MENA region to help improve patient outcomes by standardizing local cancer care; including new adaptations focused on genetic/familial risk assessment for breast, ovarian, and prostate cancers; management of adult cancer pain; and ovarian/fallopian tube/primary peritoneal cancers.

Sub-Saharan Africa (SSA)

NCCN continued to collaborate with the African Cancer Coalition (ACC) and American Cancer Society (ACS) to improve cancer care in the Sub-Saharan Africa (SSA) region. In 2023, Robert W. Carlson, MD, former CEO of NCCN, was recognized and honored by the ACC members during a meeting in Kigali, Rwanda, for being instrumental in collaborating and creating the NCCN Harmonized Guidelines™ for SSA and successfully continuing the collaboration and improving cancer care in SSA.

During additional meetings in Zimbabwe, pictured below, and Senegal, NCCN expanded and updated our harmonized resources for the SSA region. NCCN also attended the African Organization for Research and Training in Cancer (AORTIC) International Conference on Cancer in Africa, in Dakar, Senegal in November 2023.

Poland

NCCN announced a collaboration with the Institute of Hematology and Transfusion Medicine in Poland (IHTM), and the Alliance For Innovation—Polish-American Foundation (AFI). The three organizations have signed an agreement enabling clinicians to share their established expertise and international experience in order to improve quality of care and outcomes for patients with hematologic malignancies in Poland and around the world.

Europe

NCCN took part in La Fundación para la Excelencia y la Calidad Oncológica (ECO)'s “European Beating Cancer Plan: Implementation in the Member States” event during a European Parliament session in Brussels, Belgium, pictured below on the left. During the meeting, leaders discussed the need for setting up a European Network of Cancer Centers with at least one reference center in each Member State. This will improve quality standards for cancer care by developing a series of common measurements that can be evaluated in each center and facilitate the sharing of tools and training.

In October 2023, NCCN CEO Crystal S. Denlinger, MD, pictured below on the right, accepted an award from Spain's ECO Foundation at the ESMO Congress in Madrid for NCCN's commitment to advancing global cancer care.

Global NCCN Guidelines Resources

NCCN Framework for Resource Stratification of NCCN Guidelines (NCCN Framework™)

Developed to define appropriate treatment pathways based on available resources and deliver a tool for health care providers to identify treatment options that will provide the best possible outcomes in resource-constrained settings

- 21 NCCN Framework™ are available
 - Covers ~83% of global incidence of cancers
 - Outlines a rational approach for building cancer management systems based on the availability of resources in low-and middle-income countries where certain diagnostic tests and/or treatment approaches may be unavailable
-

NCCN Harmonized Guidelines™

Modified NCCN Guidelines targeted to regional resources in Sub-Saharan Africa and Vietnam

- Created as part of a collaborative global effort to combat skyrocketing cancer rates and unique circumstances of cancer care
 - Includes pragmatic approaches that provide effective treatment options for resource-constrained settings
 - 54 NCCN Harmonized Guidelines™ for Sub-Saharan Africa are available; more updates are in progress
 - NCCN Harmonized Guidelines™ for Vietnam: Non-Small Cell Lung Cancer were published in November 2023
-

International Adaptations

Modified NCCN Guidelines to aid clinicians in determining appropriate and effective avenues of care in a specified country or region of the world

- Developed by the host country or region's oncology thought leaders in conjunction with NCCN Guidelines Panel Members
 - Account for metabolic differences in populations, accessibility of technology, and regulatory status of health care
 - 27 International Adaptations of the NCCN Guidelines are available (including 8 new adaptations published in 2023)
-

International Translations

NCCN Guidelines translated from English

- 51 NCCN Guidelines have been translated into one or more languages
 - NCCN Content has been translated into 71 different languages
-

Global Webinars

NCCN hosted two global policy webinars in 2023:

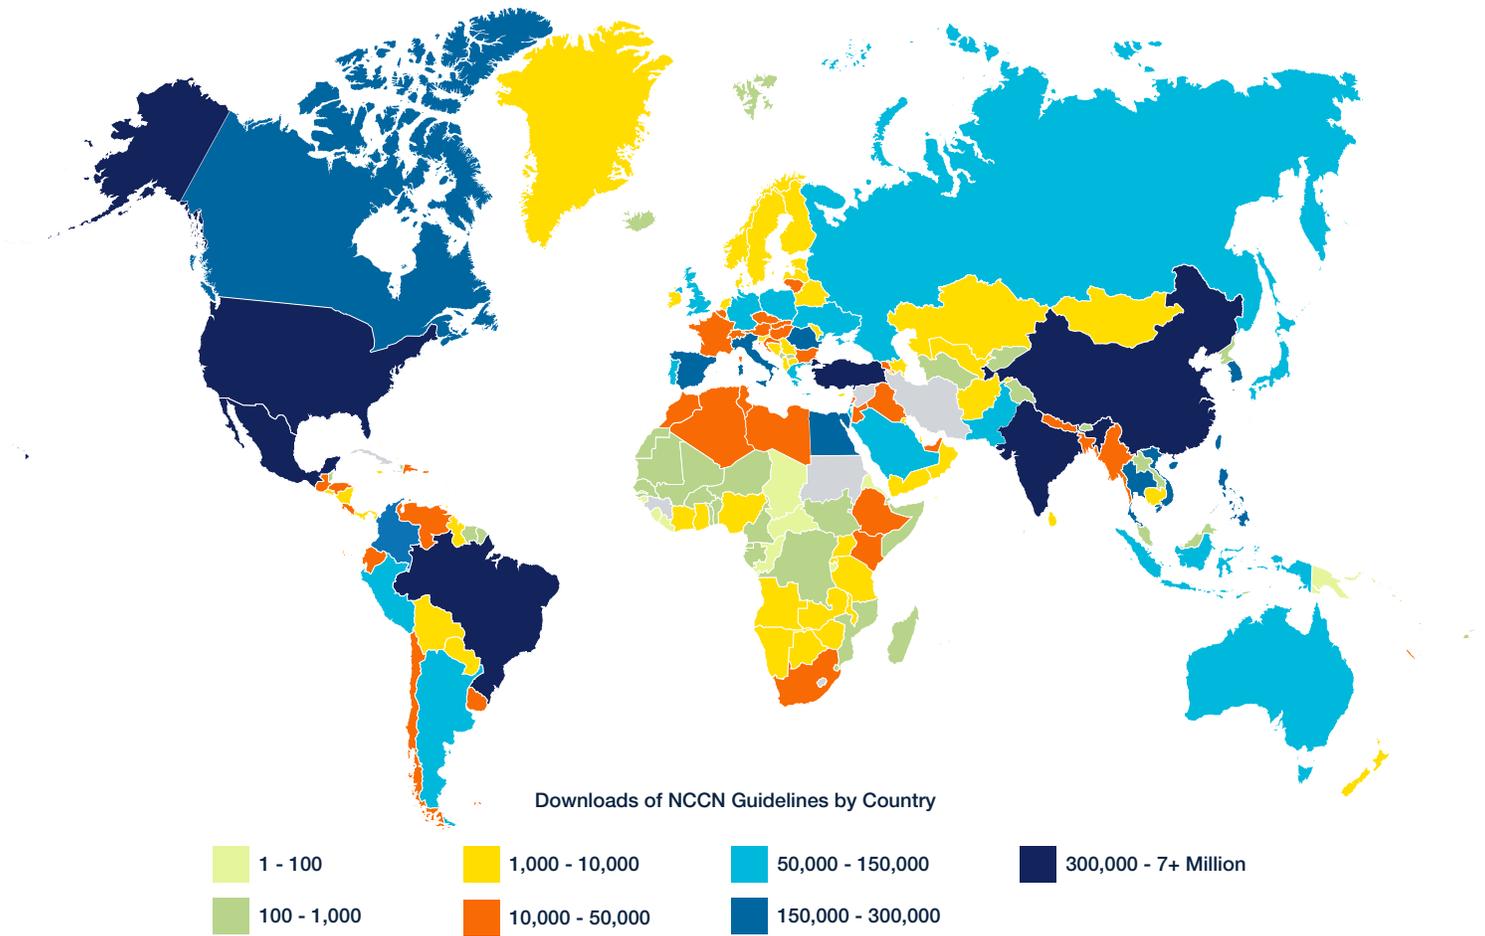

- Non-Medical Influences and Barriers to Access High-Quality Cancer Care Globally
- The Utility and Value of National Cancer Control Plans (NCCPs) Across the Economic Spectrum
- More than 500 total participants

Latin American Regional Breast Cancer Summit: Advocating and Implementing Guideline-Concordant Cancer Care for Patients

- NCCN and the Latin American and Caribbean Society of Medical Oncology (SLACOM) hosted a virtual summit in November 2023
 - More than 150 registrants and participants from 19 countries
-

Available free online for non-commercial use at [NCCN.org](https://www.nccn.org) and via the NCCN Mobile App.

Research to Foster Innovative, Effective, and Equitable Cancer Care

258

Member Institution faculty and staff participated in ORP standing committees and ad hoc RFP development teams (RFPDT)

117

Posters presented virtually and published in *JNCCN* as part of the NCCN 2023 Annual Conference, including oral poster presentations featuring the top 5 abstracts and 6 Young Investigator Awardees

19

Active Young Investigator Awardees, including 4 newly funded investigators in 2023

\$5.2 million

Approximate amount awarded to NCCN Member Institutions through NCCN Oncology Research Program research initiatives managed by the grantors

The NCCN Oncology Research Program (ORP) fosters innovation and knowledge discovery to improve the lives of patients with cancer.

To improve the lives of patients with cancer, the ORP facilitates investigation of FDA-approved and investigational agents/devices, pursuing innovative, effective, and equitable cancer therapy. In addition, ORP-funded investigators work to develop new insights into cancer care delivery outcomes and quality, as well as seek solutions to barriers affecting optimal cancer management. The ORP aims to increase opportunities for NCCN Member Institution faculty to participate in oncologic investigation and supports those who are, or will become, leaders in cancer research. Through presentations and/or publication in peer-reviewed journals, the ORP ensures the knowledge gained through the program is disseminated to the medical community at large. ORP collaborations between academia and industry are constructive, appropriate, and transparent, resulting in valuable knowledge that improves cancer management.

NCCN Oncology Research Program

General Poster Session

In addition to supporting investigator-initiated research and quality improvement grants, the ORP facilitates the NCCN General Poster Session presented in conjunction with NCCN's Annual Conference and oversees the NCCN Foundation Young Investigator Awards (YIA) program.

The 2023 General Poster Session, pictured below, returned to an in-person event and had hundreds of participants. Poster tours were offered as a new feature to highlight research of interest.

In 2023, ORP-funded investigators:

- Published manuscripts in the following journals:
 - *Clinical Cancer Research*
 - *Clinical Lung Cancer*
 - *Frontiers of Oncology*
 - *JCO Precision Oncology*
 - *Gynecologic Oncology*

- Presented abstracts at meetings including:
 - American Association for Cancer Research
 - American Society of Clinical Oncology
 - Society of Gynecologic Oncology
 - World Conference on Lung Cancer

JNCCN circulation

13.4

Impact factor measuring
how frequently *JNCCN*
is cited in other journals

***JNCCN* is dedicated to disseminating research results and new knowledge locally, nationally, and internationally while enhancing the collaboration between academic medicine and the community physician.**

The journal provides the latest information on innovations in translational medicine, along with cutting-edge oncology health services research, including quality care and value, comparative and cost-effectiveness, public policy, and interventional research on supportive care and survivorship. *JNCCN* features updates on the NCCN Guidelines, including the NCCN Guidelines Insights, which provide behind-the-scenes views into the NCCN Guidelines Panel discussions that lead to important updates.

In 2023, the impact factor for *JNCCN* continued to grow steadily, hitting 13.4 for the latest year. This marks an increase of more than eight points since 2017. The scientometric index is calculated by Clarivate, based on the yearly average number of citations of articles published during the previous two years. With the current impact factor, *JNCCN* now ranks in the 1st quartile at 92.3 percent.

JNCCN Resources

JNCCN—Journal of the National Comprehensive Cancer Network

Peer-reviewed, PubMed-indexed oncology journal

- 13 issues per year, including a special edition on the NCCN Annual Conference

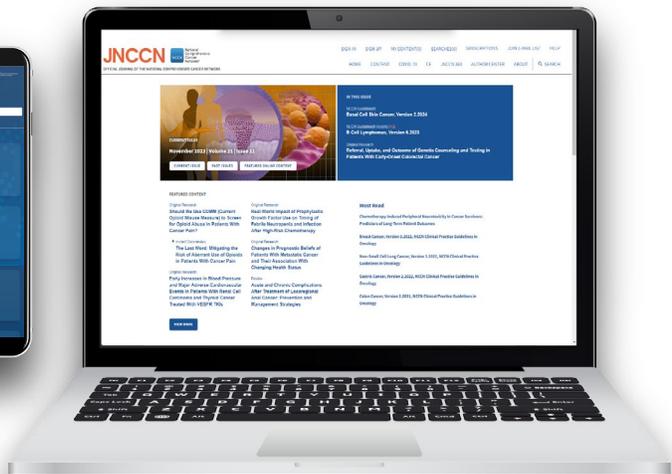

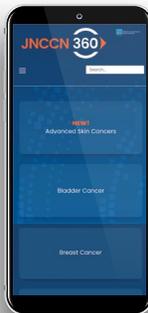

Available in print and online at JNCCN.org

JNCCN 360

An online resource that helps users quickly learn what's new and important in the oncology world

- Organized by specific tumor type or disease and features links to key articles, trials, patient resources, videos, and more
- Spotlights focus on specific therapies with clinical pearls from practitioners on how best to use them effectively and safely in practice

NCCN Flash Updates™

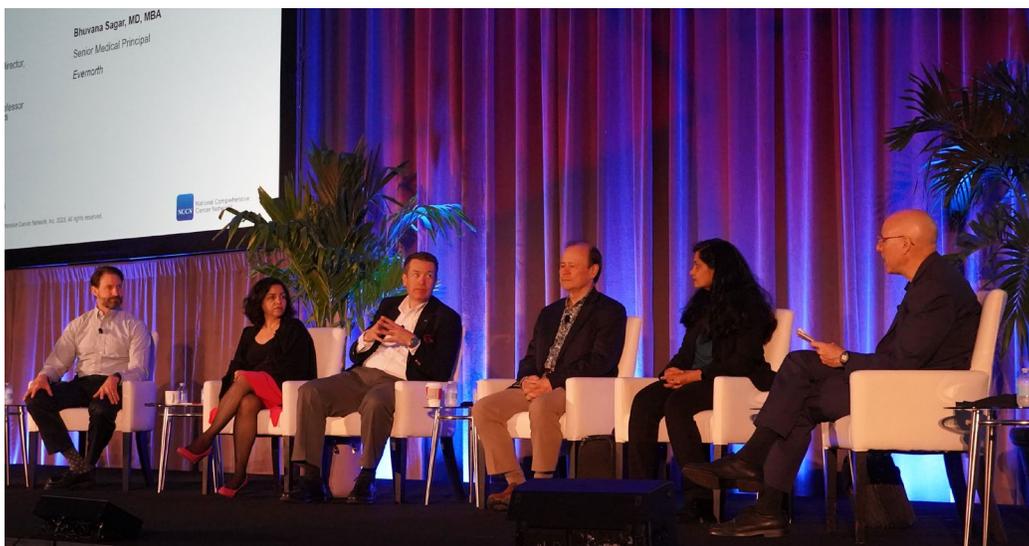

NCCN recognizes and appreciates the importance of ensuring that all stakeholders in oncology care have access to NCCN Guidelines and NCCN Content in whatever format they use. Throughout 2023, NCCN and oncology stakeholders continued to improve knowledge about evidence-based cancer care.

NCCN works with multiple organizations to disseminate NCCN Content and engages key stakeholders to enhance collaborative efforts to expand awareness of NCCN programs and resources. In addition, NCCN collaborates with public and private payers, employers, pharmacy benefits managers, and related organizations for effective use of the NCCN Guidelines and associated clinical content for the development, implementation, and assessment of coverage and quality policies and programs.

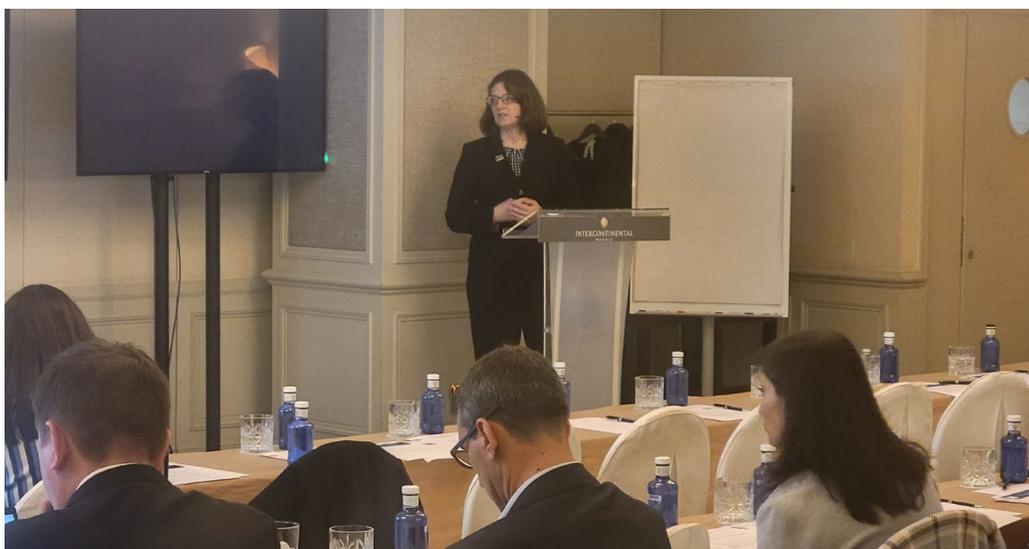

In 2023, NCCN engaged professionals from healthcare, pharmaceutical, biotechnology, and information technology organizations to discuss pressing issues in oncology:

- Ensuring Access to Innovative Oncology Therapies and Care in the Age of the Inflation Reduction Act
- Addressing the Mental Health Needs of Patients with Cancer
- Reducing Disparities Through Community Engagement and Collaboration

NCCN Business Development

The NCCN Academy for Excellence & Leadership in Oncology™ spring meeting was held in March 2023 in Orlando, FL.

NCCN Global Academy for Excellence & Leadership in Oncology™ was held in October 2023 in Madrid, Spain.

Programs to Engage Industry Stakeholders

NCCN Academy for Excellence & Leadership in Oncology™

Interactive program through which pharmaceutical and biotech professionals learn about pressing issues in oncology today and how to apply this knowledge

- The March meeting was held in Orlando, FL
- The September meeting was held in Philadelphia, PA
- More than 230 attendees

NCCN Global Academy for Excellence & Leadership in Oncology™

Interactive program focused on pressing issues in the global oncology environment

- 2023 meeting was held in Madrid, Spain
- 52 attendees

NCCN Corporate Council

Works to enhance collaborative efforts between NCCN and pharmaceutical, biotechnology, and diagnostic companies to better serve patients

- The March meeting was held in Orlando, FL
- The September meeting was held in Philadelphia, PA
- 98 members

NCCN Global Corporate Council

Advances the development and expansion of NCCN Global programs by providing the opportunity for open dialogue, collaboration, and support of NCCN's mission and vision outside the United States

- 2023 meeting was held in Madrid, Spain
 - 23 members
-

Using the NCCN Guidelines at Point of Care

NCCN Content in Health Information Technology (HIT)

Incorporated in health information technology (HIT), through permissions and licensing arrangements

- NCCN Content is licensed by 88 HIT companies. Learn more at [NCCN.org/HIT](https://www.nccn.org/HIT)

NCCN Content in Electronic Health Records (EHRs)

Organizations use NCCN Content in electronic health records through licensing arrangements

- Licensees of the NCCN Guidelines that provide decision support at point-of-care and NCCN Guidelines concordance reporting include AmerisourceBergen's IntelliDose TxM, Flatiron Assist, and McKesson Specialty Health Clear Value PlusSM (CVP)
- EHR companies that licensed NCCN Templates for point-of-care tools in 2023 include Cerner, CureMD, Epic, InformedGENOMICS, iKnowMed, MOSAIQ, MEDITECH, Navista, and OncoEMR

NCCN Flash Updates™

Timely outlines of the most recent updates to NCCN products and resources direct to subscribers' and licensees' inboxes

- NCCN sent 323 Flash Updates via email in 2023
- More than 11,000 individuals receive NCCN Flash Updates™

Programs to Engage Employers and Payers

Employer & Payer Initiatives

NCCN works with commercial insurers, employers, and purchasers to ensure their members are receiving high-quality cancer care

- NCCN Guidelines and associated resources are used for coverage determination for at least 85% of covered lives in the United States, including by CMS for Medicare and commercial payers and purchasers
- NCCN has a free NCCN Employer Toolkit for employers to utilize when designing their cancer coverage policies

NCCN Employer Forum

Employer stakeholders discuss the current state of oncology care and relevant healthcare issues

- The NCCN Employer Advisory Group includes employers and employer coalition groups that are responsible for covering millions of lives through their employer-sponsored plans
- The NCCN Employer Forum was held in September in Philadelphia, PA

Promoting Effective Policies

41

Articles, statements, comment letters, and endorsement letters written by the NCCN Policy team

64

Meetings with policymakers and administrators

Throughout 2023, NCCN continued to lead the way by collaborating with healthcare policy stakeholders to ensure that NCCN continued to influence policy in support of our mission and vision.

To facilitate equitable access to quality care as recommended by NCCN Guidelines, NCCN collaborates with stakeholders to improve and facilitate quality cancer care and ensure the use of NCCN Guidelines in health policy and coverage determination and patient access to guideline-concordant care.

Cancer Care Equity

In 2023, NCCN announced Terrance Mayes, EdD, of the Stanford Cancer Institute, pictured left, as Chair of the NCCN DEI Directors Forum. Loretta Erhunmwunsee, MD, FACS, of City of Hope National Medical Center, pictured right, was named Vice-Chair. They join more than 20 experts on diversity, equity, and inclusion in health care from NCCN Member Institutions. The NCCN DEI Directors Forum provides a venue to share challenges and best practices in advancing DEI initiatives in a timely fashion.

In 2023, NCCN joined the call to close the care gap on World Cancer Day, a global awareness day organized by the Union of International Cancer Control (UICC) every February 4, by launching a new Health Equity Report Card (HERC) pilot program. This project aims to evaluate the feasibility of implementing the HERC as a tool for improving the quality and equity of cancer care.

Addressing Nationwide Chemotherapy Shortage

In June 2023 the NCCN Best Practices Committee shared survey results that found 93 percent of cancer centers surveyed at that time were experiencing a shortage of carboplatin and 70 percent lacked a steady supply of cisplatin. NCCN then released a statement calling for action from the Federal Government and its agencies, the pharmaceutical industry, providers, and payers to work together to ensure quality, effective, equitable, and accessible cancer care. Since then, NCCN has worked with the White House, National Cancer Institute, Centers for Medicare & Medicaid Services, and Congress, along with other oncology nonprofits, to advocate for short- and long-term fixes.

“We hope that by sharing this survey and calling for united action across the oncology community, we can come together to prevent future drug shortages and ensure quality, effective, equitable, and accessible cancer care for all.”

- Alyssa Schatz, MSW, NCCN Senior Director of Policy and Advocacy

NCCN Policy Program

Federal Legislation

The Reducing Hereditary Cancer Act is widely endorsed by patient advocacy organizations, academics, and medical institutions across the United States, including NCCN and Facing Our Risk of Cancer Empowered (FORCE). In 2023, Representatives Debbie Wasserman Schultz (FL-25), Mariannette Miller-Meeks (IA-02), Elissa Slotkin (MI-07), and Larry Bucshon (IN-08), and Senators Lisa Murkowski (R-AK) and Ben Cardin (D-MD) re-introduced bipartisan, bicameral legislation to expand access to lifesaving genetic testing to determine an individual's risk of developing hereditary cancer.

NCCN and FORCE held a Congressional Briefing on the Reducing Hereditary Cancer Act which was hosted by the bill's sponsor, Rep. Wasserman Schultz on November 14, 2023 in Washington D.C. The briefing was attended by members of the patient advocacy community, medical societies, and congressional staffers. Speakers included Dr. Tuya Pal, pictured left, of Vanderbilt-Ingram Cancer Center; Lisa Schlager, pictured right, of FORCE; and Rep. Bucshon, not pictured.

NCCN Policy Program

State Legislation

In alignment with our core mission of improving and facilitating quality, effective, equitable, and accessible cancer care, NCCN has grown a State Policy Program to engage with lawmakers throughout the country to work on expanding patient access to precision medicine through biomarker testing. The State Policy Program has joined coalitions throughout the country who share our goals and worked in concert with in-state member institutions to advance these policies. The model biomarker legislation to expand access to biomarker testing, which has passed in 14 states, has been endorsed by the National Council of Insurance Legislators (NCOIL) and has the support of inclusive and influential coalitions at the state level.

NCCN remains committed to working at the federal and state level to ensure the appropriate use of NCCN Guidelines and associated clinical content in legislation, regulation, coverage policy, and quality and value programs.

President's Cancer Panel

In 2023, NCCN engaged and acted as a subject matter expert for the President's Cancer Panel (PCP), a formal body that reports to the President on barriers to progress in reducing the burden of cancer. Former NCCN CEO Robert W. Carlson, MD, and NCCN Chief Medical Officer Wui-Jin Koh, MD, were invited to present on NCCN's efforts to advance the National Cancer Plan at the September National Cancer Plan Stakeholder Meeting hosted by the President's Cancer Panel. In November, NCCN CEO Crystal Denlinger, MD, was invited to serve as a panelist at the PCP meeting *Reducing Cancer Care Inequities: Technology Opportunities for Patient Navigation*. Finally, in December NCCN's Senior Director of Policy and Advocacy, Alyssa Schatz, MSW, was invited to serve as a panelist at the PCP meeting *Policy Considerations at the Intersection of Technology and Patient Navigation*.

NCCN Policy Programs

Cancer Across Geography

June 15, 2023

This hybrid event aimed to advance the conversation on geographic disparities and strategies which mitigate associated barriers to care. Discussions explore care imbalances across geography, recent policy and technology advancements, and current challenges associated with cancer care. Speakers and attendees included multi-disciplinary clinicians, epidemiologists, community oncologists, researchers, payers, patient advocates, industry, providers, policy makers, leaders representing underserved communities, and more. Emerging best practices to overcome barriers were discussed as well as leveraging innovative policy and practice solutions so that communities can better establish bidirectional trust between patients and providers across the care continuum.

- Program participants: 197

NCCN Policy Summits

Measuring and Addressing Health-Related Social Needs in Cancer

September 12, 2023

As a component of this summit, NCCN convened a working group in April 2023 on Measuring and Addressing Health Related Social Needs in Cancer to explore high-impact measures for endorsement, identify barriers to uptake of HRSN screening and follow up, and to promulgate policy and practice recommendations to address these barriers. The Working Group's recommendations were presented during this program. This policy summit also provided an opportunity for a varied group of stakeholders to further discuss diverse perspectives related to addressing patient needs that extend beyond the exam room. It included an overview of practice changes as well as trends in legislative and regulatory efforts that measure and address social drivers of health.

- Program participants: 227
- View Working Group Recommendations: [NCCN.org/social-needs](https://www.nccn.org/social-needs)

NCCN Patient Advocacy Summit

Navigating the Care Continuum from Screening through Survivorship

December 5, 2023

This hybrid event addressed issues associated with care transitions including from screening to diagnosis and from treatment to survivorship, disparities according to health coverage and social determinants of health, and best practices to assist patients including care coordination, patient navigation, digital innovations, and programs offered by patient advocacy organizations. The summit also highlighted practice and policy solutions needed to improve seamless care access and ultimately care outcomes for patients.

- Program participants: 350
-

NCCN Policy Program

During the June 2023 NCCN Policy Summit speakers explored how geography impacts cancer outcomes.

The December 2023 NCCN Patient Advocacy Summit explored stories and data highlighting issues associated with navigating the care continuum from screening through survivorship.

Educating Cancer Care Teams

164

CE activities

>72,760

Total participants

>75,780

CE credits earned

The NCCN Continuing Education (CE) Program continued to impact patient care by creating positive change in the competence and performance of the interprofessional oncology care team through high-quality educational programming.

The NCCN CE Program focuses on educating the interprofessional oncology care team on the application of evidence-based medicine and adherence to clinical practice guidelines, and providing the tools necessary to improve and facilitate quality, effective, equitable, and accessible cancer care so all patients can live better lives.

The NCCN 2023 Annual Conference was held as a hybrid meeting for the first time. The in-person component was held at the Orlando World Center Marriot in Orlando, FL. The program included a Plenary Session that focused on the health needs of LGBTQ+ community in oncology care.

NCCN Continuing Education

NCCN hosted the NCCN 2023 Annual Congress: Hematologic Malignancies™ in September. Sessions were presented in San Francisco, CA, and also streamed virtually.

Continuing Education Programs

NCCN Annual Conference

Presented for the first time as a hybrid event in which learners successfully participated both in-person and virtually in live sessions that discussed the latest cancer therapies and provided updates on selected NCCN Guidelines, the data upon which the NCCN Guidelines are based, and quality initiatives in oncology

NCCN 2023 Annual Conference

March 31 - April 2, 2023

- Event attendees: 1,666
- Recorded webcast viewers: 13,421

NCCN 2023 Nursing Program: Advancing Oncology Nursing™

March 30, 2023

- Event attendees: 429
- Recorded webcast viewers: 1,928

NCCN 2023 Oncology Fellows Program: New Horizons in Quality Cancer Care

March 30, 2023

- Event attendees: 85
 - Recorded webcast viewers: 650
-

Annual Congress: Hematologic Malignancies

Live hybrid meeting where world-renowned experts in hematologic malignancies discuss the latest treatment advances, updates to the standard of care as recommended in NCCN Guidelines, and challenging patient cases

NCCN 2023 Annual Congress: Hematologic Malignancies™

September 22 - 23, 2023

- Event attendees: 545
 - Recorded webcasts launched in December 2023
-

NCCN Breast Cancer Congress

Live hybrid event featuring experts in the management of breast cancer discussing new and emerging therapies, key updates to the NCCN Guidelines, and clinical research updates

NCCN 2023 Breast Cancer Congress with Updates from the 2022 San Antonio Breast Cancer Symposium™

February 3, 2023

- Event attendees: 712
 - Recorded webcast viewers: 6,663
-

NCCN Continuing Education

NCCN Congress: Biomarkers in Solid Tumors

Live virtual event featuring interactive sessions on a variety of topics related to the use of biomarkers in oncology care to meet the educational needs of health care professionals who manage patients with solid tumors

NCCN 2023 Congress: Biomarkers in Solid Tumors

May 12, 2023

- Event attendees: 360
 - Recorded webcast viewers: 2,487
-

NCCN Webinar Series

NCCN Monthly Oncology Tumor Board Series™: A Multidisciplinary Approach to Individualized Patient Care

Series of multidisciplinary case-based live webinars on the management of patients with various cancer types

- Live webinar attendees: 1,869
- Recorded webcast viewers: 2,217

NCCN Pharmacy Updates: Webinar Series

Webinar series designed for pharmacists and the oncology care team to review the clinical and patient considerations that influence how to effectively optimize the management of patients with various cancer types

- Live webinar attendees: 1,131
 - Recorded webcast viewers: 816
-

NCCN Guidelines® Insights

Articles published monthly in *JNCCN* that highlight why important decisions are made in the development of NCCN Guidelines®, and how to apply this information in clinical practice

Behind the Guidelines: Insights into the Standard of Care in Oncology 2023

- Participants: 8,712
-

Throughout 2023, NCCN educational content covered more than 35 areas of cancer care, and participants could find options tailored by practice type and learning style.

Additional Continuing Education Activities

An Update on Bladder Cancer: New Current Standards, Future Perspectives, and Unsolved Questions

Provided in collaboration with Clinical Care Options, LLC

Virtual symposium after the 2023 ASCO Annual Meeting
Genitourinary Cancers Symposium

- Virtual symposium attendees: 243
-

The Evolving Landscape in CLL/SLL: Application of Current Evidence and New Guideline Recommendations

Provided in collaboration with Clinical Care Options, LLC

Satellite Symposium at the 2023 ASCO Annual Meeting

- Live symposium and simulcast attendees: 125
 - Recorded webcast viewers: 306
-

Clinical Considerations in RCC: Evidence, Guideline Recommendations, and a View to the Future

Provided in collaboration with Clinical Care Options, LLC

Satellite Symposium at the 2023 ASCO Annual Meeting

- Live symposium and simulcast attendees: 122
 - Recorded webcast viewers: 114
-

Advances in Hepatocellular and Biliary Tract Cancers Impacting Patient Outcomes

Provided in collaboration with Clinical Care Options, LLC

Satellite Symposium at the 2023 ASCO Annual Meeting

- Live symposium and simulcast attendees: 110
 - Recorded webcast viewers: 121
-

Evidence-Based Guidance on New Paradigms in the Treatment of Acute Myeloid Leukemia

Provided in collaboration with Clinical Care Options, LLC

Online education following the 2023 ASCO Annual Meeting

- Recorded webcast viewers: 1,074
-

Applying the Latest Evidence and NCCN Guideline Recommendations in Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma

Provided in collaboration with Clinical Care Options, LLC

Satellite Symposium preceding the 65th ASH Annual Meeting and Exposition

- Live symposium and simulcast attendees: 527
 - Recorded webcast launched in December 2023
-

NCCN Continuing Education

Unlocking the Potential of Neoadjuvant and Adjuvant Immunotherapy in Resectable NSCLC: The Role of Checkpoint Inhibitors

Provided in collaboration with The France Foundation

Live meeting series to provide a greater understanding of the significance of biomarker testing to predict treatment response in NSCLC, the role of PD-1/PD-L1 inhibitors in the neoadjuvant and adjuvant settings, and how to apply this information

- Live program attendees: 241
 - Recorded webcast viewers: 523
-

Strategies to Reduce Health Disparities and Improve Outcomes in Breast and Prostate Cancer

Provided in collaboration with The France Foundation

Short educational activities to increase awareness, knowledge, and competence in the need for culturally sensitive, evidence-based, guideline recommended approaches for the treatment of breast and prostate cancer in Black patients

- Recorded webcast viewers: 2,526
-

Acute Myeloid Leukemia Patient Management Simulator

Provided in collaboration with Syandus

Educational activity featuring a series of realistic case scenarios on how to manage a variety of AML presentations over time

- Participants: 437
-

Advances in the Management of Metastatic Castration-Resistant Prostate Cancer: Expert Guidance and Resources for the Interdisciplinary Team

Provided in collaboration with Clinical Care Options, LLC

Live meeting series to inform and improve the clinical performance of the interdisciplinary team involved in the care of patients with prostate cancer

- Live program attendees: 104
 - Recorded webcast launched in December 2023
-

Individualized Multidisciplinary CLL Care: Practical Application of Guidelines and Emerging Data

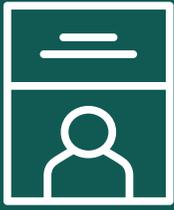

Provided in collaboration with Clinical Care Options, LLC

Live meeting series examining recent advances and current NCCN-recommended best practices in the treatment of CLL

- Live programs started in November 2023
 - Recorded webcast launched in January 2024
-

NCCN collaborated with Prova Education and The ECO Foundation on a new learning opportunity for the global oncology community in 2023. The Global Immunotherapy Learning Center provided short episodes that focused on various types of solid tumors to facilitate optimized selection and management of immunotherapies. These episodes received more than 32,800 views.

NCCN Guidelines for Patients

In 2023, the NCCN Foundation, the philanthropic arm of NCCN, continued to lead the way in empowering people living with cancer and advancing oncology innovation by supporting the publication of more NCCN Guidelines for Patients[®], securing funds to expand and update resources for patients, and funding a new group of promising young investigators through the NCCN Foundation Young Investigator Awards (YIA) Program.

Funding the NCCN Guidelines for Patients

NCCN Guidelines for Patients are patient-friendly versions of the NCCN Guidelines. They are based on the same treatment information doctors use and help patients, families, and caregivers talk with their clinicians about the best treatment options for them.

These step-by-step guides to the latest advances in cancer care feature:

- Questions to ask doctors
- Patient-friendly illustrations
- Glossaries of terms and acronyms

NCCN Expands Supportive Care Resources

Throughout 2023, NCCN focused on expanding resources for supportive care. NCCN released new patient guidelines for:

- Blood Clots and Cancer
- Fatigue and Cancer
- Palliative Care

These resources are focused on improving quality of life for people with cancer while making sure care planning reflects individual needs and priorities.

Educating Patients with Free Webinars

NCCN continued a series of free webinars for people living with cancer and their caregivers. In 2023, NCCN hosted our first pediatric patient webinar focusing on acute lymphoblastic leukemia. NCCN also highlighted a patient webinar on CAR T-cell therapy for lymphoma and side effects for the first time in 2023.

These live informational programs are created in conjunction with NCCN Guidelines for Patients. The webinars are also recorded and posted for anyone to view afterward as a value to future patients.

In 2023, NCCN Guidelines for Patients had more than 1.4 million downloads by more than 1.2 million individuals.

NCCN Guidelines for Patients: Invasive Breast Cancer	82,989 Downloads
NCCN Guidelines for Patients: Colorectal Cancer Screening	62,126 Downloads
NCCN Guidelines for Patients: Prostate Cancer: Early stage	59,424 Downloads
NCCN Guidelines for Patients: Colon Cancer	55,223 Downloads

NEW NCCN Guidelines for Patients Published in 2023

- Blood Clots and Cancer
- Fatigue and Cancer
- Gastrointestinal Stromal Tumors (GIST)
- Hodgkin Lymphoma in Children
- Inflammatory Breast Cancer
- Palliative Care

Free Patient and Caregiver Resources

NCCN Guidelines for Patients®

Adapted NCCN Guidelines written in plain language to help patients, families, and caregivers talk to clinicians about the best treatment options

- Comprehensive library of 71 Guidelines for Patients

Free online at [NCCN.org/patientguidelines](https://www.nccn.org/patientguidelines) and via the NCCN Patient Guides for Cancer App

Global Language Translations

NCCN Guidelines for Patients translated from English

- NCCN Guidelines for Patients are translated into 18 languages
- Used by organizations around the world

Free online at [NCCN.org/patientguidelines](https://www.nccn.org/patientguidelines) and via the NCCN Patient Guides for Cancer App

Patient Webinars

Information from NCCN Guidelines for Patients presented in a live online informational program

- 6 patient webinar sessions were held in 2023
- Presenters from multiple disciplines including providers, advocates, and patients
- Q&A section allows audience engagement

NCCN Patient Resources Recognized for Excellence

The NCCN Guidelines for Patients: Uterine Cancer won a 2023 APEX Award for Publication Excellence. The award is based on excellence in graphic design, editorial content, and the ability to achieve overall communications.

The NCCN Guidelines for Patients: Chronic Myeloid Leukemia (CML) won a 2023 Silver eHealthcare Leadership Award as a healthcare site in the best care/disease management category.

The NCCN Webinar for Patients: Early-Stage Prostate Cancer and the NCCN Guidelines for Patients: Acute Myeloid Leukemia (AML) won 2023 Digital Health Awards. These awards honor the best digital health resources developed for consumers and health professionals.

The NCCN Guidelines for Patients: Chronic Lymphocytic Leukemia won a 2023 bronze National Health Information Award. These awards honor the nation's best consumer health programs and materials.

Growing Collaborations and Increasing Reach

NCCN Foundation worked with 210 patient advocacy organizations and 55 healthcare collaborations to collaborate on and promote the NCCN Guidelines for Patients.

In 2023, the NCCN Foundation established new relationships with community healthcare organizations, professional associations, and employers to increase awareness of and access to NCCN patient resources. This work helped reach an additional 1.5 million people.

New NCCN Foundation Board Members

NCCN Foundation elected three new board members in the fall of 2023. The new board members include Denise Porter, SteegeThomson Communications; Chris Price, Epilog Partners, LP; and Tamar Thompson, Alexion AstraZeneca Rare Disease.

Young Investigator Awards (YIA) Program

Since the program's inception in 2011, the NCCN Foundation has awarded more than \$10.3 million to 70 early career investigators from NCCN Member Institutions.

The NCCN Foundation YIA Program works with the NCCN Oncology Research Program to identify and nominate the most promising young investigators representing NCCN Member Institutions. Selected early-career investigators receive vital funding for cancer research to spur treatment innovation and career advancement. Awardee research is highlighted in many scientific healthcare publications and journals.

In 2023, YIA funders included AbbVie; Amgen Inc.; AstraZeneca; Exelixis Inc.; and Pfizer Inc.

“Supporting the YIA program is investing in the future of scientific research. By backing young investigators, you’re fostering innovation, driving progress, and ultimately contributing to advancements in healthcare. Nurturing young talent helps ensure a sustainable pipeline of skilled researchers who will continue pushing the boundaries of knowledge and innovation.”

NCCN Leadership, Committees, Groups, and Panels

2023 NCCN Awardees

Every year, NCCN recognizes outstanding contributions from team members.

Rodger Winn Award

Presented to a faculty member who embodies Dr. Winn's enthusiasm, love of life, and dedication and commitment to the development of evidence-based guidelines tempered by expert judgment.

**Douglas E. Wood, MD,
FACS, FRCSEd**
*University of Washington School
of Medicine and Fred Hutchinson
Cancer Center*

Pat Daulerio Employee of the Year Award

Recognizes an individual on NCCN Staff who has made major contributions to the success of NCCN.

**Donna M. Powell, DHSc,
CMD, RT(T)**
**Senior Scientist,
Radiation Therapy &
Imaging Programs**
*National Comprehensive
Cancer Network*

NCCN Board of Producers Award

Presented to individuals for exemplary service of NCCN's mission.

**Theresa J. Franco, MSN,
RN**
*Nebraska Medicine's
Fred & Pamela Buffett
Cancer Center*

F. Marc Stewart, MD
*City of Hope
National Medical Center*
