NCCN Toolkit of Digital Resources

Virtual Policy Summit: The Impact of Technology on Cancer Care in 2021

This toolkit highlights digital tools to support cancer patients as discussed during the **NCCN Virtual Policy Summit: The Impact of Technology on Cancer Care in 2021** held on September 9, 2021. This free online program explored the rapid advancement of technology and its impact on cancer care. A diverse group of expert speakers and panelists discussed how innovation impacts patient outcomes, best practices for the use of technology within care delivery, and policies that influence and support technological advancements and access to high-quality care.

To view a recording of this presentation and information about upcoming NCCN Policy Summits, visit [NCCN.org/summits](https://www.nccn.org/summits).

Please note: This toolkit is meant to provide additional information about tools discussed during the NCCN Policy Summit and is not meant as an endorsement or recommendation of products included.

THE CANCER IMAGING ARCHIVE

Explore The Cancer Imaging Archive today!

While **The Cancer Imaging Archive (TCIA)** is a valuable and evolving resource for the Cancer Imaging research community, TCIA is also a helpful, easy-to-use resource for cancer patients to find and view examples of radiology/pathology imaging.

TCIA features an impressive breadth of imaging data with **145 collections consisting of over 48,000 subjects totaling over 50 million images!**

The imaging data include radiology, radiation therapy, and histopathology image modalities based on a wide variety of cancers and imaging test models.

COVID Cancer Care

Helping people living with cancer cope with COVID-19 related stress and anxiety

Visit COVIDCancerCare.com.

We recommend that you discuss the use of this program with your physician or a member of your oncology care team. This program does not represent a substitute for medication. Additional information about coping with infectious disease risks during cancer can be found in the help section of this program.

Please contact your healthcare provider for screening and treatment of any persistent anxiety or depressive symptoms, or in case of a life threatening medical or psychiatric emergency, please call 911.

Cancer Support Community

Flatiron Health

A risk stratification solution that improves quality of care and reduces preventable high-cost episodes

GOALS:

- prevent bias in identification of high risk patients
- reduce workflow inefficiencies
- highlight the impact of care teams

DESIGNED FOR:

- nurse navigators
- care coordinators
- social workers
- care managers

KEY FEATURES:

- data aggregation for proactive care management
- bias assessment with continuous monitoring

NCCN Apps for the Oncology Community

FREE for Smartphone and Tablet

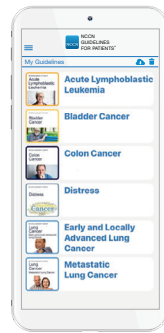

Virtual Library of NCCN Guidelines®

This easy-to-use and convenient format further assists health care

professionals in their implementation of the NCCN Guidelines® and NCCN Guidelines for Patients®, thus improving care provided to people with cancer.

- Easy access to NCCN Guidelines, global resources, and NCCN Guidelines for Patients
- Hyperlinks within the Guidelines
- Ability to quickly share Guidelines
- Optimized search and viewing options

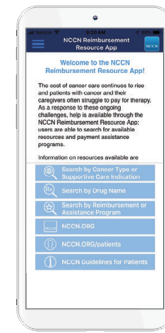

NCCN Patient Guides for Cancer

People with cancer and caregivers can access patient-friendly NCCN

Guidelines for expert cancer treatment information.

- Step-by-step guides to treatment options
- Questions to ask doctors
- Patient-friendly illustrations
- Based on information doctors use
- Ability to download and share patient guidelines

NCCN Reimbursement Resource

The cost of cancer care continues to rise and patients with cancer and

their caregivers often struggle to pay for therapy. Search for available resources and payment assistance programs by:

- Cancer type or supportive care indication
- Drug name
- Company/program name
